NewTek Remote Storage Powered by SNS

studio network solutions

From providing instant access to an expansive library of stored media assets, to enabling essential and extended recording sessions, to supporting hours upon hours of content for archive, on-demand, and post-production, shared remote storage is a principal requirement for modern production workflows.

Complete your installation with NewTek Remote Storage – Powered by SNS. Powerful, scalable, shared storage solutions with optional chassis and network connectivity expansion, NewTek Remote Storage systems are designed to meet the high-capacity, high-performance demands of today's live production environments and readily adaptable to your media needs.

• 4-bay, 8-bay, and 16-bay options supporting base capacity from 24TB to 96TB
• 4 x NDI® video server outputs for real-time playback across the network
• Support for simultaneous multi-channel capture, ingest, editing, and playback
• Unlimited SNS ShareBrowser licenses included for access and collaboration
• High-performance SAN and NAS subsystem
• Industry-standard SATA/SAS removable drive bays
• Expansion chassis and network connectivity options available

At A Glance

NewTek NRS16
